

## User Interaction

Different levels of harshness for the insults

**sliders???**

Add friends on the platform to share the quotes

Be able to rate quotes on different metrics to train AI

**How harsh it is**

users can like/dislike their quotes and other users' quotes

How much it makes sense

Use sliders for this as well, or a like/dislike system

## How to get data?

dataset of de-motivational quotes?

Could write them, get them from other sources, or a mix

**images are related to quote?**

collection of images somewhere

**Users can submit quotes they like?**

Need to address trolls submitting happy quotes?

## General

mods deleting quotes when getting certain dislikes

a certain degree of uncanny valley (almost perfect, but not quite)

**reverse inspirobot**

Quotes on top of a background image

## Mediums

Optional notifications to get daily insults

Can choose how often and when you want notifications

**Possible website**

Make it generate desktop backgrounds

**create printable calendars**

**Possible app**

saving images (png, jpeg, etc)

**voice chat by voice command**

## Personalization

Light mode, dark mode, and other custom themes

**personalization (names?)**

Different levels of personalization, can choose how much

Find appropriate quotes based on social media pages

Can upload custom photos for backgrounds
